

# DoD's easy search engine

## Your research just became a world easier.

The Total Electronic Migration System (TEMS) gives you instant access to the full online collection of IAC scientific and technical information.

## All you need is a computer, a Web browser and a DTIC user account.

TEMS takes it from there. Two easy-to-use tools simplify your research by providing full text, videos, indexes, summaries, and a "tree view" search of unique IAC taxonomies that further expands the researchers world of knowledge.

**Defense Technical Information Center (DTIC)**, the sponsor of TEMS, is the premier provider of Department of Defense (DoD) scientific and technical information. DTIC serves as the vital information link within DoD and between DoD and other Government organizations.

<http://www.dtic.mil>

**DoD Information Analysis Centers (IACs)** are research and analysis organizations operated by DTIC and chartered by DoD. TEMS gives users Web access to the comprehensive scientific and technical knowledge bases that IACs provide and maintain for researchers, engineers, scientists, program managers, and warfighters—every stakeholder from developer to user.

<http://iac.dtic.mil>

**Information Assurance Technology Analysis Center (IATAC)**, one of the IACs, has taken the lead in developing and deploying TEMS for DoD. IATAC specializes in Information Assurance (IA) technologies in system vulnerability, research and development, models, and analysis.

# TEMS

Total Electronic Migration System

## TEMS is the tool to speed your mission.

TEMS lets you access and search the scientific and technical knowledge base of DoD's state-of-the-art Information Analysis Centers (IACs). If it's information vital to your field, you'll find it here. Read and download reports, assemble bibliographies and indexes... all accessed by one powerful search system.

# Chart your course **faster** with TEMS

SPEED YOUR PROGRESS TOWARD JOINT VISION 2020 GOALS.

### Search Easy ...

Use TEMS just like your favorite Web search engine—simply enter key words or a query and view the results. You can choose which libraries to search.

Powered by the most advanced search technology, TEMS will retrieve not only exact matches, but will analyze related words and alternate spellings for relevancy. Plus, you can create a bibliography and add results with just one click. You will have the added advantage of searching with fully developed, unique IAC taxonomies.

### ... Or Get Technical

For precise searches, go to Advanced Search and specify data fields—search by author or date ranges, for example.

You can also query using Boolean operators (such as “AND,” “OR,” and “NOT”), wildcards, and exact phrases. Even more, you can save your queries for later reference, editing and re-use.

With a security clearance and user account you will be able to search classified documents of selected IACs through the Secret Internet Protocol Router Network (SIPRNET) when the system becomes available in the future.

### TEMS is your access to IAC knowledge

Gain instant access to:

- Reports, reviews, handbooks
- Abstracts and indexes
- Newsletters, literature, reference works
- Research databases
- and more...

TEMS provides:

- One source for the latest scientific and technical information (STI)
- A digital archive of historical STI, safe from degradation
- A critical data backup capability in case of routine or catastrophic disruption.

It's easy to get started—go to <http://www.dtic.mil> and click Registration.
